Malta
10-12 February
2012

This event will provide an overview of the management of Head and Neck cancer, within a format of lectures, case presentations and interactive discussion, with an emphasis on audience participation throughout. The course objective is to offer a comprehensive evidence-based multidisciplinary approach to the management of head and neck cancer, and the varied experiences of the authoritative faculty will add rich insights to the programme.

Course Topics

thyroid, salivary glands, the neck, larynx, oropharynx, hypopharynx, nasopharynx, nose and sinuses, anterior skullbase, rare tumours

This course has been awarded 15 CME credits
in line with UEMS criteria
